

SIBA developed a water-based paint range based on acrylic vinyl resins, especially suitable for bituminous waterproofing, ensuring unique decorative results. The product range includes various water-based paint types which can thus meet specific application requirements (washable, breather-type, mould-proof).

COLOURED WATER-BASED PAINT

ROAD & INDUSTRIAL BITUMEN

## IDROSIBA AC 8021

Coloured water-based paint with special pigments which add a pleasant finish while maintaining the typical mould and mildew-proof properties of traditional water-based paint.

This product is designed to ensure the protection of concrete and wooden construction elements from UV rays and weathering.

## Available in various colours

White  
Light grey  
Dark brown  
Red  
Chrome green  
Bespoke colours made to order

### PACKAGING

• 25Kg cans

### STORAGE

Long storage time in sealed containers, protected from frost and high temperatures

## Easy application

Roller or brush application of paint on surfaces

## IDROSIBA AC 8021 Technical Specifications

Determination of dry residue	%	53 ± 2
Determination of pH	-	7 ± 0,5
Density at 25 °C	g/cm <sup>3</sup>	1,030 ± 0,05
Brookfield viscosity at 20°C speed 5/rmp.4	cps	12000 ± 1500
